

Lifting slings

Divided leg supports / Shoulder-high back

BasicSling

Standard model for users with good head stability

BasicSling is designed for use in most common lifting situations, e.g. for sitting transfers between bed and wheelchair, and when the patient has poor torso stability but good head stability. This standard model suits most users with good head stability. The shoulder-high back ensures that the user is supported from the tailbone up to the shoulders and under the legs. BasicSling is available in several different materials, variants and sizes, all for users weighing max 300 kg / 660 lbs.
